Charged Hydrophobic Polar Special

a Amino acid substitution — Position

b Additive / Interaction

c STING — Density — additive / interaction

d $R = 0.64$, $P < 0.001$ — Fit — True FACS enrichment

e WT Residue — Mutant Residue

f Amino acid substitution — Position

g Additive / Interaction

h IFN — Density — additive / interaction

i $R = 0.63$, $P < 0.001$ — Fit — True FACS enrichment

j WT Residue — Mutant Residue

k Amino acid substitution — Position

l Additive / Interaction

m NFkB — Density — additive / interaction

n $R = 0.66$, $P < 0.001$ — Fit — True FACS enrichment

p WT Residue — Mutant Residue

q Amino acid substitution — Position

r Additive / Interaction

s ATF3 — Density — additive / interaction

t $R = 0.39$, $P < 0.001$ — Fit — True FACS enrichment

u WT Residue — Mutant Residue
